Claims 1-3 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Raulins. The patent to Raulins discloses the recited tube 65,66 provided with threaded connections at both ends, where marks 67 and 68 are provided on the pipe ends to be used for orienting a thread machined in an axial direction of the tube, the two marks being positioned relative to each other that a half line perpendicular to the center axis departing from the center axis towards the second extremity as the second extremity departs from the center axis and passes through the second mark, where each threaded end is provided with the marks which correspond to each other.
